

Alessandro Rossi

Full Stack Developer & DevOps Engineer

Rome, Italy | (+39) 3887788362 | alessandro0024@gmail.com

[Portfolio](#) | [LinkedIn](#)

Professional Summary

Experienced Full Stack and DevOps Developer with 4+ years of hands-on expertise building scalable backend systems, cloud infrastructure, and modern web applications. Proven track record of designing and maintaining enterprise-level APIs, containerized microservices, and infrastructure solutions. Strong technical foundation in cloud platforms (Azure), container orchestration (Docker), and monitoring systems. Bilingual professional with C1-level English proficiency and a passion for clean architecture and DevOps best practices.

Work Experience

.NET Backend Developer & Infrastructure Specialist

Interlogica | Rome, Italy

March 2022 – Present

- **Architecture & Modernization:** Led infrastructure improvements and security enhancements by migrating all APIs to Azure API Manager, enabling better governance and rate limiting for enterprise clients
- **Backend Development:** Developed and maintained RESTful APIs using ASP.NET Core 3.1 and the latest .NET technologies, transitioning legacy BizTalk APIs to modern, scalable solutions serving major car rental operations
- **Database Management:** Administered and optimized Oracle and MSSQL database instances, ensuring data integrity, performance, and backup strategies for critical business systems
- **Infrastructure as Code:** Implemented containerized deployments using Docker and Docker Compose, enabling consistent environments across development, staging, and production
- **Monitoring & Logging:** Configured Elasticsearch and Kibana stacks for centralized log aggregation, application performance monitoring, and security auditing across microservices

Key Technologies: C#, .NET Core, ASP.NET, Entity Framework, Docker, Docker Compose, Azure API Manager, Azure VMs, Oracle, MSSQL, Elasticsearch, Kibana

Salesforce Full Stack Developer

Deloitte Italia | Rome, Italy

July 2021 – March 2022

- **Portal Development:** Architected and implemented a new administrative portal module enabling customer admins to create, edit, and manage users with granular permission controls
- **Identity Management:** Integrated external identity and access management (C-IAM) services, implementing secure authentication and authorization flows
- **Agile Methodologies:** Collaborated in agile sprints using Jira, delivering features across both Waterfall and Agile project phases with rigorous code review and quality assurance processes
- **Quality Assurance:** Authored and maintained comprehensive unit tests, conducted code reviews, and performed benchmarking to ensure production-ready code quality

Key Technologies: Salesforce, Apex, JavaScript, HTML/CSS, C-IAM, Agile, Jira, Unit Testing

Technical Skills

Backend & Full Stack Development

Languages:

C#, Java, Rust, TypeScript/JavaScript, C++, C, Bash

Frameworks & Libraries:

.NET Core, ASP.NET, Entity Framework, Actix-Web, React, Angular, Node.js

Testing & Quality:

TDD, Unit Testing (Jest, xUnit), Code Review Best Practices

Architectural Patterns:

RESTful APIs, Microservices, Design Patterns, Domain-Driven Design

Infrastructure & DevOps

Containerization:

Docker, Docker Compose, Image Management, Dockerfile optimization

Cloud Platforms:

Microsoft Azure (API Manager, VMs, resource management)

Monitoring & Logging:

Elasticsearch, Kibana, centralized log aggregation, APM

Databases:

MSSQL, Oracle, Entity Framework ORM

Frontend Development

Web Technologies:

TypeScript, JavaScript (ES6+), HTML5, CSS3

UI Frameworks:

React, Angular

Styling:

Tailwind CSS, Bootstrap

Soft Skills

Agile & Scrum methodologies • Cross-functional team collaboration • Code review and mentoring • Problem-solving and technical documentation • Bilingual communication (Italian, English C1)

Education

Bachelor's Degree in Computer Science

Università degli Studi di Genova

October 2018 – September 2022

Field of Study: Information and Communication Technologies – Software Development and Analysis | **EQF Level:** 6 | **Credits:** 183 CFU

Relevant Coursework: Introduction to Programming & Data Structures • Algorithms and Complexity Analysis • Software Engineering (Design Patterns, UML, Refactoring) • High & Low Level System Design • **Thesis:** Software Testing Methodologies in Salesforce Enterprise Environments

Languages

Language	Proficiency
Italian	Native
Spanish	A1-A2 (Basic User)
English	C1 (Proficient) – Listening, Reading, Writing, Spoken Production & Interaction
